

Notion Business OS — Blueprint

The five connected databases behind the demo — copy the structure into your own Notion workspace.

This is the complete schema for the AutomationKIT business operating system: a CRM, Sales Pipeline, Projects, Tasks, and an SOP Library, all linked together. Two ways to use it:

One-click template. Clone the whole workspace into your Notion here:

https://sustaining-verse-3bb.notion.site/Home-AutomationKIT-388c6115f2e08164bf62f9cd8b3cb4f9?source=copy_link

Open it, then click **Duplicate** at the top-right.

- **Duplicate the template (fastest):** open [the Notion template](#) and click **Duplicate** (top-right) to clone the entire workspace — all five databases, views, and relations — into your own Notion.
- **Build it from this blueprint** — recreate the five databases below. Property names matter: the automations reference them exactly (including the emoji in select options).

Why the structure matters. The n8n automations write to these databases by property name. If you rename a property or change a select option's text (emoji included), update the matching workflow node too.

● Home hub

A top-level page named **Home — AutomationKIT** with the header "*Your business runs here. Everything connected, nothing missed.*" It links to all five databases and shows three at-a-glance linked views: New Leads, Active Pipeline, and My Tasks.

● CRM

Property	Type	Options / format
Name	Title	—
Company	Text	—
Email	Email	—
Phone	Phone	—

Status	Select	● Lead, ● Prospect, ● Client, ★ Alumni, ✗ Cold
Lead Score	Number	plain
Priority	Select	● Urgent, ● High, ● Medium, ○ Low
Industry	Select	Home Services, Agency, SaaS, Ecommerce, Real Estate, Consulting, Prof. Services, Local Service, Other
Buying Intent	Select	High, Medium, Low
Opp Low / Opp High	Number	dollar
Source	Select	Website Form, Referral, Event, Cold Outreach, Other
AI Summary	Text	filled by the AI scoring workflow
Challenge	Text	the prospect's stated bottleneck
Lead Date / Start Date	Date	—
Onboard Client / Offboard Client	Button	UI-only; add by hand (see Setup Guide)

Views: All Contacts (table) · Active Pipeline (Status = Prospect/Client, sort Lead Score ↓) · New Leads (Status = Lead, sort Lead Date ↓) · By Priority (board grouped by Priority).

● Sales Pipeline

Property	Type	Options / format
Deal Name	Title	—
Contact	Relation → CRM	two-way
Stage	Select	● New, ● Discovery, ● Proposal, ● Negotiation, ✓ Closed Won, ✗ Closed Lost
Deal Value	Number	dollar
Close Date	Date	—
Probability	Number	percent
Next Action	Text	—
Owner	Person	—

Views: Pipeline Board (board by Stage — primary) · All Deals (table) · Closing Soon.

● Projects

Property	Type	Options / format
Project Name	Title	—
Client	Relation → CRM	two-way
Status	Select	● Kickoff, ● Discovery, ● In Progress, ● Review, ✓ Complete, ● Archived
Project Manager	Person	—
Start Date / Due Date	Date	—
Contract Value	Number	dollar
Project Type	Select	Automation Setup, Consulting, Implementation, Retainer, Training
Health	Select	● On Track, ● At Risk, ● Off Track
Offboarded	Checkbox	set by the offboarding workflow

Views: Active Projects (board by Status, ≠ Archived) · All Projects (table) · Timeline (Start → Due).

✓ Tasks

Property	Type	Options / format
Task	Title	—
Project	Relation → Projects	two-way
Assigned To	Person	—
Status	Select	● To Do, ● In Progress, ✗ Blocked, ✓ Done
Priority	Select	● Urgent, ● High, ● Medium, ○ Low
Due Date	Date	—
Notes	Text	—

Views: My Tasks (≠ Done, sort Priority then Due) · Board (by Status) · By Project.

● SOP Library

Property	Type	Options / format
----------	------	------------------

SOP Name	Title	—
Department	Select	Sales, Marketing, Operations, Client Success, Finance, HR
Version	Text	—
Status	Select	✓ Active, ● Draft, ● Archived
Owner	Person	—
Last Reviewed	Date	—
Tags	Multi-select	Onboarding, Automation, Client, Sales, Finance, Marketing

Views: All SOPs (table grouped by Department) · Active (Status = Active).

Note on Button properties. Notion's Button type can't be created by API — add **Onboard Client** and **Offboard Client** to the CRM by hand once your workflows are live. The Setup Guide walks you through it.
